Allowable Subject Matter

Claims 1-13 are allowed.

Reasons for Allowance

Claims 1-13 are allowable over the prior art for at least the reason that the prior art fails to teach or to reasonably suggest *a scanning optical system comprising, inter alia, a birefringent double-image member disposed on said optical paths of said beams, said birefringent member splitting each of said beams into an ordinary ray and an extraordinary ray displaced from said ordinary ray in an auxiliary scanning direction to travel in a vicinity of said ordinary ray, said auxiliary scanning direction being perpendicular to the main scanning direction*, as set forth in the claimed combination.

Guerin (US 5,436,755 A) discloses a scanning optical system (see raster scanner 10 depicted in Fig. 1) that comprises (among other elements) a birefringent beam splitter (i.e., element 20 in, e.g., Figs. 1 & 3; please see column 1, lines 65-67). This reference, however, fails to disclose wherein said birefringent beam splitter splits each of said beams incident thereon into an ordinary ray and an extraordinary ray displaced from said ordinary ray in an auxiliary scanning direction to travel in a vicinity of said ordinary ray, said auxiliary scanning direction being perpendicular to the main scanning direction.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
